ChamaSpark -- Hackathon Winning Project

Bootstrap, Python, Django, MPESA, PayPal, OpenAI

Led a team to develop a digital platform for women's chamas in Kenya. The system allows users to:

- Register/Join/Sign in to chamas
- Read articles posted by chairlady
- Receive meeting alerts, contribute funds online via MPESA or PayPal
- Manage fines and view events via calendar
- SparkGal, an AI chatbot powered by OpenAI, helps women navigate the platform and engage in women's affairs
- Won 1st place in a 55-team hackathon

PulseTrack -- Hackathon Winning Project

Django, Twilio/WhatsApp API, HuggingFace Transformers, TextBlob, Chart.js

An AI-driven HR pulse check tool that gathers anonymous employee feedback via chatbot and visualizes company health in real-time. Features sentiment analysis, topic modeling, and automated HR suggestions. Targeted at mid-sized companies and NGOs for early detection of burnout and disengagement.

- AI-driven sentiment analysis and feedback clustering using HuggingFace/TextBlob
- Dashboard with heatmaps, keyword clouds, and weekly AI-generated reports
- Won 1st place at Impact Africa Network Hackathon (AI: The Future of Work), competing with 25+ teams

ResumeAI -- AI-powered Resume Builder

React, Django, PostgreSQL, Redis, Celery, Gemini, Groq, Grok

ResumeAI customizes CVs and cover letters based on job descriptions using advanced AI. It incorporates machine learning with confidence scoring to improve over time.

- Frontend hosted on Vercel, backend on Render
- Queued processing with Redis and Celery for scalable performance
- AI integrations: Gemini, Groq, Grok for intelligent content generation
